English Important Safety Information

This safety guideline is to help you operate your Innergie power adapter safely, to ensure your personal safety, and to reduce the risk of fire, electric shock, or injury.

- Read all instructions in the user manual carefully before operating the adapter.

- Do not open the device; there are no serviceable parts inside.

- Your adapter should be used with cables and tips approved by Innergie only. Using your adapter with cables and tips not approved by Innergie may result in serious or fatal injury, and/or property damage.

- Do not operate the power adapter near a heat source, a heat vent, under direct sunlight or humid conditions for long durations. Your power adapter should be used indoor between temperatures 0 °C - 35 °C (32 °F - 95 °F).

- To prevent injury and/or property damage, disconnect the input power cable from the adapter when it is not used.

- The adapter may become hot during normal operation. Please handle the adapter carefully during and immediately after operation.

- While operating the adapter, check periodically that the input and output cables are connected firmly. Loose power cables can generate harmful heat and can damage the adapter.

- Verify the power requirement of the device you intend to charge before operating your adapter, charging with the wrong voltage or wattage may harm your device.
